

Brainstorming & Idea Prioritization Template

Date	15 March 2024
Team ID	xxxxxxx
Project Name	opticrop
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Paligala kavitha	Analyze soil nutrients (N, P, K, pH, moisture) to improve crop selection	Soil Analysis	1
2	Nagaram chakradhar singh	Develop a machine learning model for accurate crop recommendation	Machine Learning	1
3	Chandra Vardhan reddy kamireddy	Integrate weather parameters (temperature, humidity, rainfall) into crop prediction	Weather Analytics	1
4	Sanjana raghuraman	Design a user-friendly web interface for farmers to enter soil and climate data	Web Application/UI	1
5	Tejasree nagalla	Build the complete OptiCrop	Smart Agriculture	1

		system by combining soil analysis, weather data, and ML-based crop recommendation		
6				

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	OptiCrop – Smart Agricultural Production Optimization Engine using Machine Learning for Crop Recommendation	High	High	1	Yes
2	Fertilizer Recommendation System based on Soil Nutrients	Medium	High	2	No
3	Plant Disease Detection using Image Processing	Medium	Medium	3	No
